Summary

Lead Software Development Engineer in Test and Java-focused backend engineer with 11+ years of experience designing Java Springboot services, test automation frameworks, leading distributed QA teams, and delivering high-quality releases for global banks and fintech platforms across payments, compliance, surveillance, and wealth management domains. Proven track record in UI, API, DB, and MQ automation; performance and rollback testing; and building GenAI-powered test management solutions that improve coverage, reduce cycle time, and increase release confidence.

Core Skills

Languages & Backend: Java, Springboot, JPA, REST APIs, JavaScript, TypeScript

Frontend: Angular, React

Test Automation: Selenium WebDriver, Cucumber BDD, TestNG, JUnit, RestAssured, Playwright, HP UFT, IBM Rational Integration Tester

Gen AI, Agentic AI: Prompt Engineering, Claude Code, Agent Orchestration, Google, Anthropic LLMs, LangChain, DeepEval

Messaging & Data: JMS, IBM MQ, Apache Druid, MySQL, MariaDB, Graph DBs, XML/JSON/TXT/DAT parsers

DevOps & Tooling: Jenkins, Jira, Zephyr, Octane, Git, Bitbucket, SVN, BlazeMeter

Practices: Test strategy, regression automation, service virtualization, performance testing, rollback validation, BDD, Agile/Scrum, offshore/onshore team leadership

Domains: Retail & wholesale banking, cross-border payments, compliance & surveillance (Actimize), wealth management, commercial banking portals

Professional Experience

Infosight Consulting

Singapore

Lead SDET (Client: DBS Bank)

Jan 2026 – Present

- Led Quality Engineering for a data heavy web-based application with in-sprint software test automation.
- Initiated POCs with Agentic AI Claude Code. Handled Agent Orchestration. Implemented multiple Agents for internal teams.
- Co-led AiTHENA, a GenAI-powered test management platform integrated with DBS GPT and NLP, accelerating test planning, automation, and sign-off by ~40% for internal teams.
- Delivered 20+ full-stack features across three internal platforms (Java, Spring Boot, Angular), improving delivery velocity by ~30% and enabling faster in-sprint automation.
- Built data emulators and UI/API/DB automation frameworks for CRUISE, achieving 90%+ regression coverage and saving 400+ manual testing hours per release.
- Designed JWT-based authentication and role-based access control to secure feature-level authorization for 100+ enterprise users.
- Built data emulators for test data virtualization across 4+ environments, reducing environment wait time by ~50% and enabling parallel test execution.
- Led engineering metrics, performance, and rollback validation, aggregating 50+ KPIs from Jira, Jenkins, and Sonar and validating 1M+ monthly alerts on Apache Druid and MySQL.

A-IT Software Services Pte Ltd

Singapore

Lead SDET (Client: DBS Bank)

Jan 2024 – Jan 2026

- Co-architected and implemented AiTHENA, a GenAI-powered test management product that improved test planning, design, automation, and sign-off efficiency by ~40%.
- Integrated DBS GPT and NLP libraries to auto-generate and refine test plans, reducing manual effort in test plan creation by ~60% and standardizing documentation.

- Spearheaded UI/API/DB automation for CRUISE, delivering 90%+ regression automation and saving 400+ manual hours per release.
- Contributed to SQUAD metrics dashboard backend (Java, Spring Boot), aggregating 50+ weekly metrics from Jira, Jenkins, and Sonar to improve quality KPI visibility.

Worldwide Express Dallas, TX, USA (Remote/Onsite)
Lead SDET Jun 2023 - Oct 2023

- Led a 12-member QA team (4 onshore, 8 offshore) for payments & invoicing platforms, improving collaboration and release predictability across time zones.
- Drove end-to-end automation of legacy manual regression suites, significantly reducing test cycle time for critical payments and invoicing features.
- Implemented scalable UI automation using Playwright with Java and API automation using RestAssured and TestNG, improving regression coverage and release confidence.

Morgan Stanley New York, NY, USA
Lead SDET Mar 2023 - Jun 2023

- Designed and rolled out scalable test automation frameworks for wealth management applications, including tool evaluation and onboarding across projects.
- Partnered with the Testing Center of Excellence to standardize testing practices, improve process efficiency, and drive best-practice adoption.
- Led Agile test planning and story grooming, providing estimates, mapping requirements to tests, and mentoring engineers on code quality and automation strategy.

Wells Fargo Hyderabad, India
Senior SDET Jun 2021 - Dec 2022

- Contributed to full-stack development of cross-border payment microservices using Java Spring Boot, JPA, and React JS.
- Built a custom MQ automation framework for real-time payment validation over JMS and IBM MQ, reducing manual queue testing by 90%.
- Developed payment data parsers (XML, JSON, TXT, DAT) to extend automation coverage across diverse inbound and outbound payment files.
- Onboarded BlazeMeter to CI/CD pipelines to enable performance testing as part of early-stage validation.

DBS Bank Hyderabad, India
SDET Jan 2019 - Jun 2021

- Led functional, DB, and API automation for Actimize surveillance alerts using Selenium, Java, JUnit, Cucumber BDD, and Gherkin, automating 150+ scenarios across 50 sprints.
- Enhanced in-house automation frameworks to improve modularity and maintainability, reducing manual testing effort by 80%.
- Developed a QA dashboard (Java Spring Boot, Angular) to track test progress, defects, and automation coverage; integrated Jira, Zephyr, Octane, and Jenkins into QA workflows.
- Acted as shadow Scrum Master for multiple sprints, facilitating ceremonies and ensuring Agile practices.

Earlier Experience Hyderabad, India
Senior QA Specialist, Wells Fargo Jan 2017 - Jan 2019
Software Engineer, Tech Mahindra (Citi Bank) Jul 2014 - Dec 2016

- Led automation for commercial banking portals and private-label cards using Selenium WebDriver, Cucumber BDD, Java, TestNG, HP UFT, and HP ALM.
- Migrated manual regression suites to automation, significantly reducing regression execution time and enabling continuous integration.

Education

Rajiv Gandhi University of Knowledge Technologies, Nuzvid **India**
Bachelor of Technology (B.Tech.), Mechanical Engineering 2010 - 2014
